# Agenda

## Agenda

### Lower Flint-Ochlockonee Water Council Meeting

November 5, 2021

Albany State University West Campus  
Student Center & by Videoconference

#### **Objectives:**

- 1) Provide orientation on regional water council and planning process
- 2) Review forecasts of water and wastewater demands for region
- 3) Discuss Council's vision statement and goals
- 4) Hear updates on current regional water planning review and revision process
- 5) Learn about several water-related activities in the region

9:45 am – 10:00 am	Registration
10:00 am – 10:10 am	Welcome & Agenda Review – Mark Masters, GWPPC
10:10 am – 10:45 am	Introductions – Mark Masters
10:45 am – 12:00 pm	Orientation to Regional Water Planning – Steve Simpson, B&V
12:00 pm – 12:45 pm	Lunch
12:45 pm – 12:55 pm	Chair's Report – Chairman Royal
12:55 pm – 1:05 pm	Report on Thomasville Stormwater Planning Seed Grant Project – Steve Simpson
1:05 pm – 1:20pm	EPD Report: Planning Schedule and Resource Assessments -- Jennifer Welte (GAEPD)
1:20 pm – 1:35 pm	Water and Wastewater Forecasts Overview – Steve Simpson & Jake Dean, Black & Veatch
1:35 pm – 2:05 pm	Agricultural Water Demand Forecasts – Mark Masters, GWPPC
2:05 pm – 2:35 pm	Vision and Goals Discussion
2:35 pm – 2:45 pm	Public Comment
2:45 pm – 3:00 pm	Next Steps and Adjourn

# 2021 Council Member Orientation

November 2021

# Introductions

## RICHARD ROYAL

### Council Chair for:

Lower Flint-Ochlockonee

[richardroyal@yahoo.com](mailto:richardroyal@yahoo.com)

(229) 328-6060

## JENNIFER WELTE

Georgia EPD

### Liaison for:

Lower Flint-Ochlockonee

[Jennifer.welte@dnr.ga.gov](mailto:Jennifer.welte@dnr.ga.gov)

(470) 384-7450

## KRISTIN ROWLES

GWPPC

### Council Lead for:

Lower Flint-Ochlockonee

[krowles@h2opolicycenter.org](mailto:krowles@h2opolicycenter.org)

(404) 822-2395

## STEPHEN SIMPSON

Black & Veatch

### Council Advisor for:

Lower Flint-Ochlockonee

[simpsonsl@bv.com](mailto:simpsonsl@bv.com)

(770) 521-8105

## MARK MASTERS

GWPPC

### Council Advisor for:

Lower Flint-Ochlockonee

# Council Member Orientation

---

# Policy Statement

**“Georgia manages water resources in a sustainable manner to support the state’s economy, to protect public health and natural systems, and to enhance the quality of life for all citizens.”**

*2004 Comprehensive Statewide  
Water Management Planning Act*

# Two Decades of Water Planning

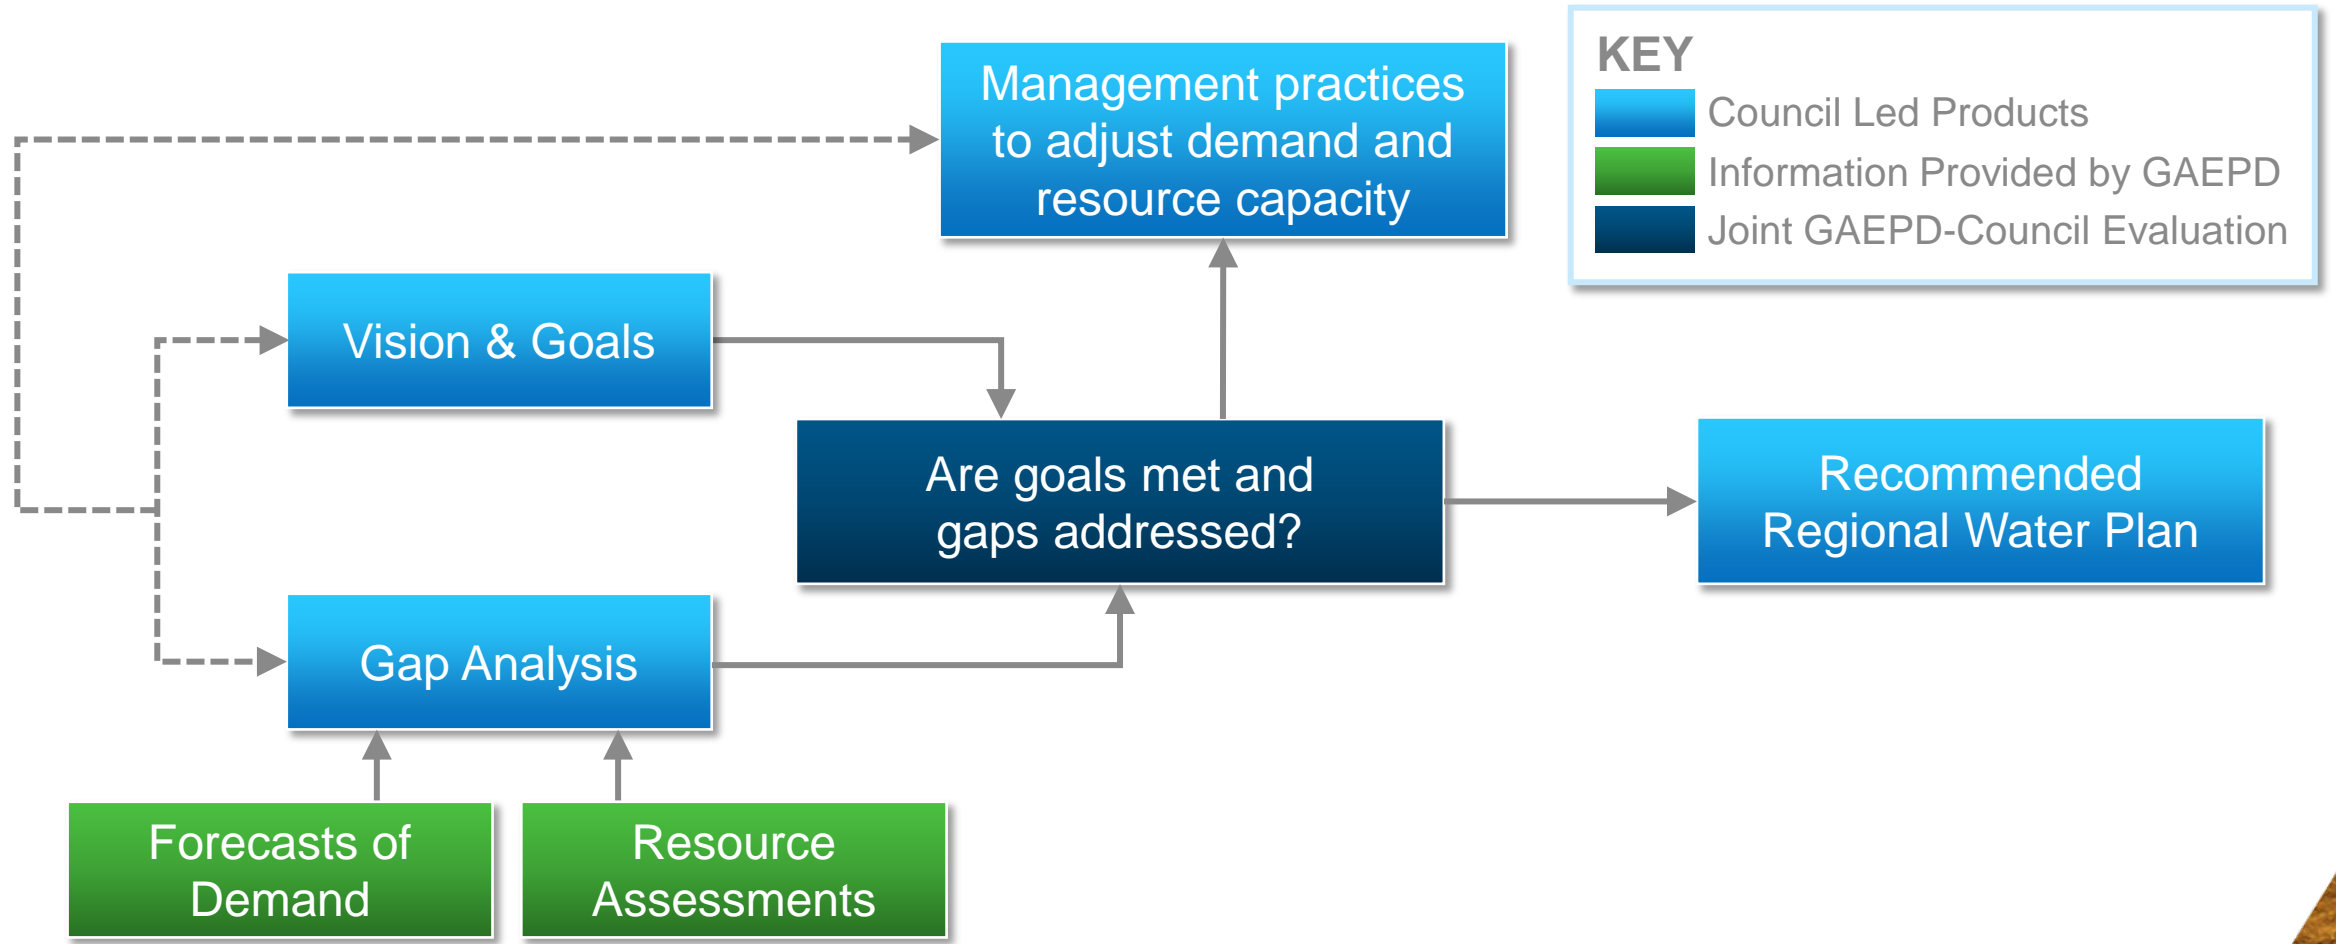

# Regional Water Planning Councils

- ① COOSA-NORTH GEORGIA
- ② METRO WATER DISTRICT
- ③ SAVANNAH-UPPER OGEECHEE
- ④ UPPER OCONEE
- ⑤ MIDDLE OCMULGEE
- ⑥ MIDDLE CHATTAHOOCHEE
- ⑦ UPPER FLINT
- ⑧ ALTAMAHA
- ⑨ COASTAL
- ⑩ LOWER FLINT-CHLOCKONEE
- ⑪ SUWANNEE-SATILLA

# Steps in the Development of the Regional Water Plan

# Regional Water Plan Review and Revision Process

## The 5-Year Review Process will focus on:

- Updated water demand and wastewater forecasts
- Updated Surface Water and Groundwater Resource Assessments (Quantity)
- Updated Surface Water Quality Resource Assessment
- Review and Refinement (if needed) of Management Practices and Recommendations to the State
- Review of Council's vision and goals

# Regional Water Plan Update

## Regional Water Plan Review and Revision Schedule

**Meeting One**  
4th Quarter 2021

**Meeting Two**  
1st Quarter 2022

**Meeting Three**  
2nd Quarter 2022

**Meeting Four**  
3rd Quarter 2022  
Draft Plan

**Meeting Five (Final)**  
4th Quarter 2022  
Incorporate  
Comments

*EPD targeted date of  
adoption of revised  
Regional Water Plan by  
December 2022*

# Stakeholder Roles and Responsibilities

- **Regional water planning councils** guide the development of the Regional Water Plans including selection of management practices to assess progress toward the regional vision and goals and the purpose of the State Water Plan.
- **Regional planning contractors** provide technical and planning support to the councils and prepare the Plans following regional water planning council guidance.
- **Local governments, other agencies** and the general **public** provide input during the planning process.
- **Other water planning councils** coordinate recommendations regarding shared water resources.
- **Georgia EPD** ensures consistency with the State Water Plan and maintain the schedule and budget for plan development.

# Responsibilities of Water Planning Councils

- Follow EPD guidance to revise & adopt an updated Regional Water Plan
- Review, comment and use data and information provided by EPD in updating the Regional Water Plans
- Coordinate with local governments and neighboring councils
- Submit revised plan to EPD by September 2022
- Coordinate with EPD to respond to public comments on the draft plan
- Make revisions based on EPD review and public comments and finalize revised plan by December 2022

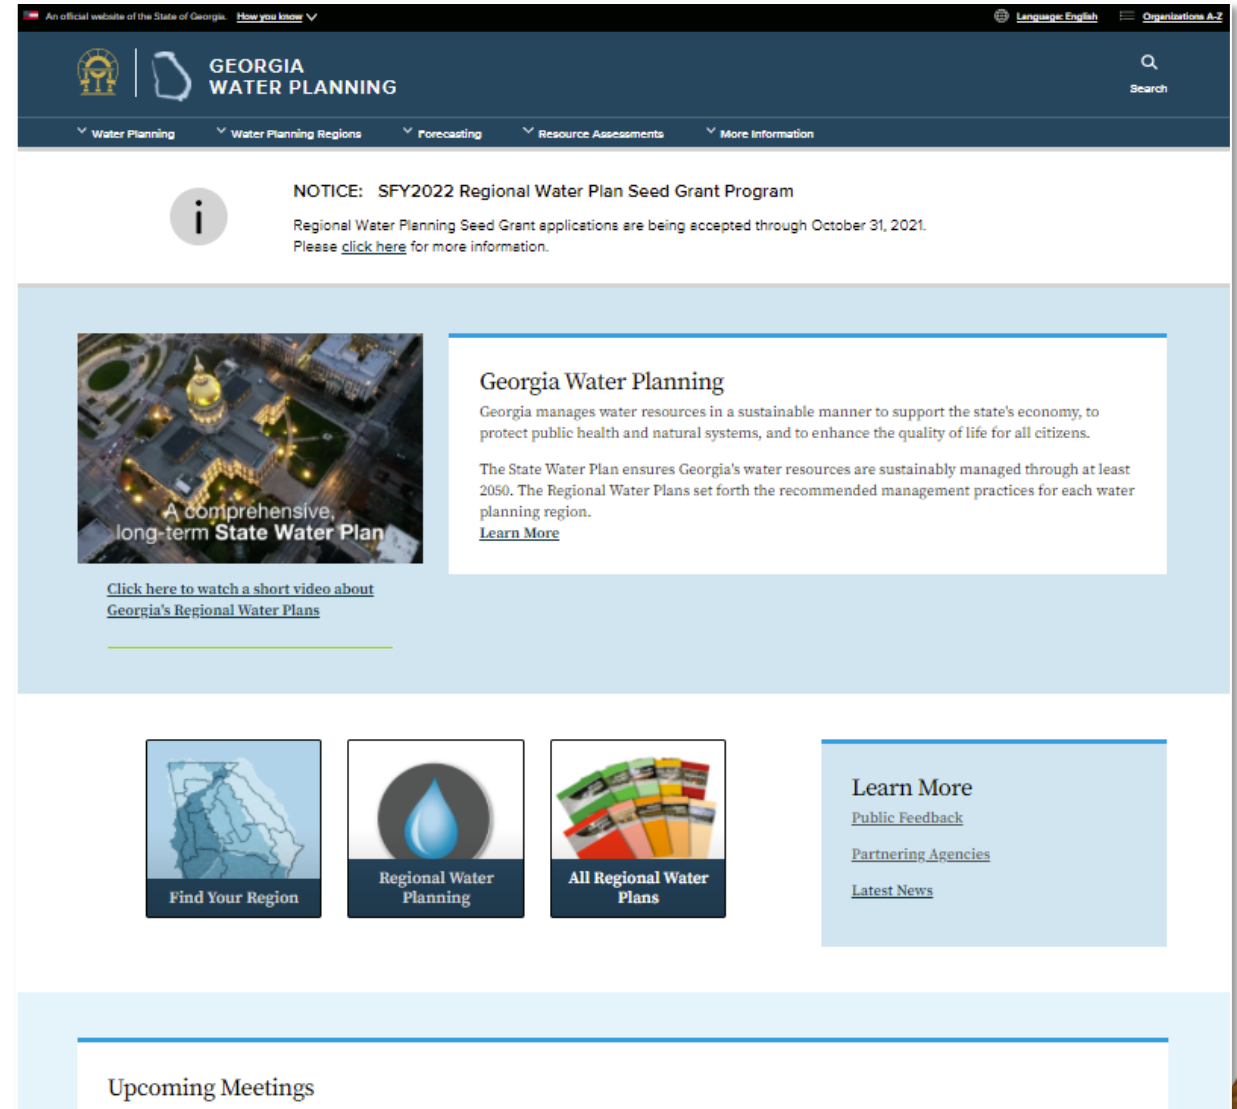

# Georgia State Water Plan Website

This website provides New (and existing) Council members with the following documents and data:

- Familiarize themselves with the existing regional water plan
- Review Vision and Goals developed by the Council
- Review Memorandum of Agreement (MOAs) and Operating Procedures, and Rules for Meetings
- Familiarize themselves with forecasts on website (coming soon!)
- Familiarize themselves with resources on Council Website

# Water Planning Process

# Planning Information Compilation and Evaluation

Water Resource  
Assessments

Forecasts

Public  
Participation

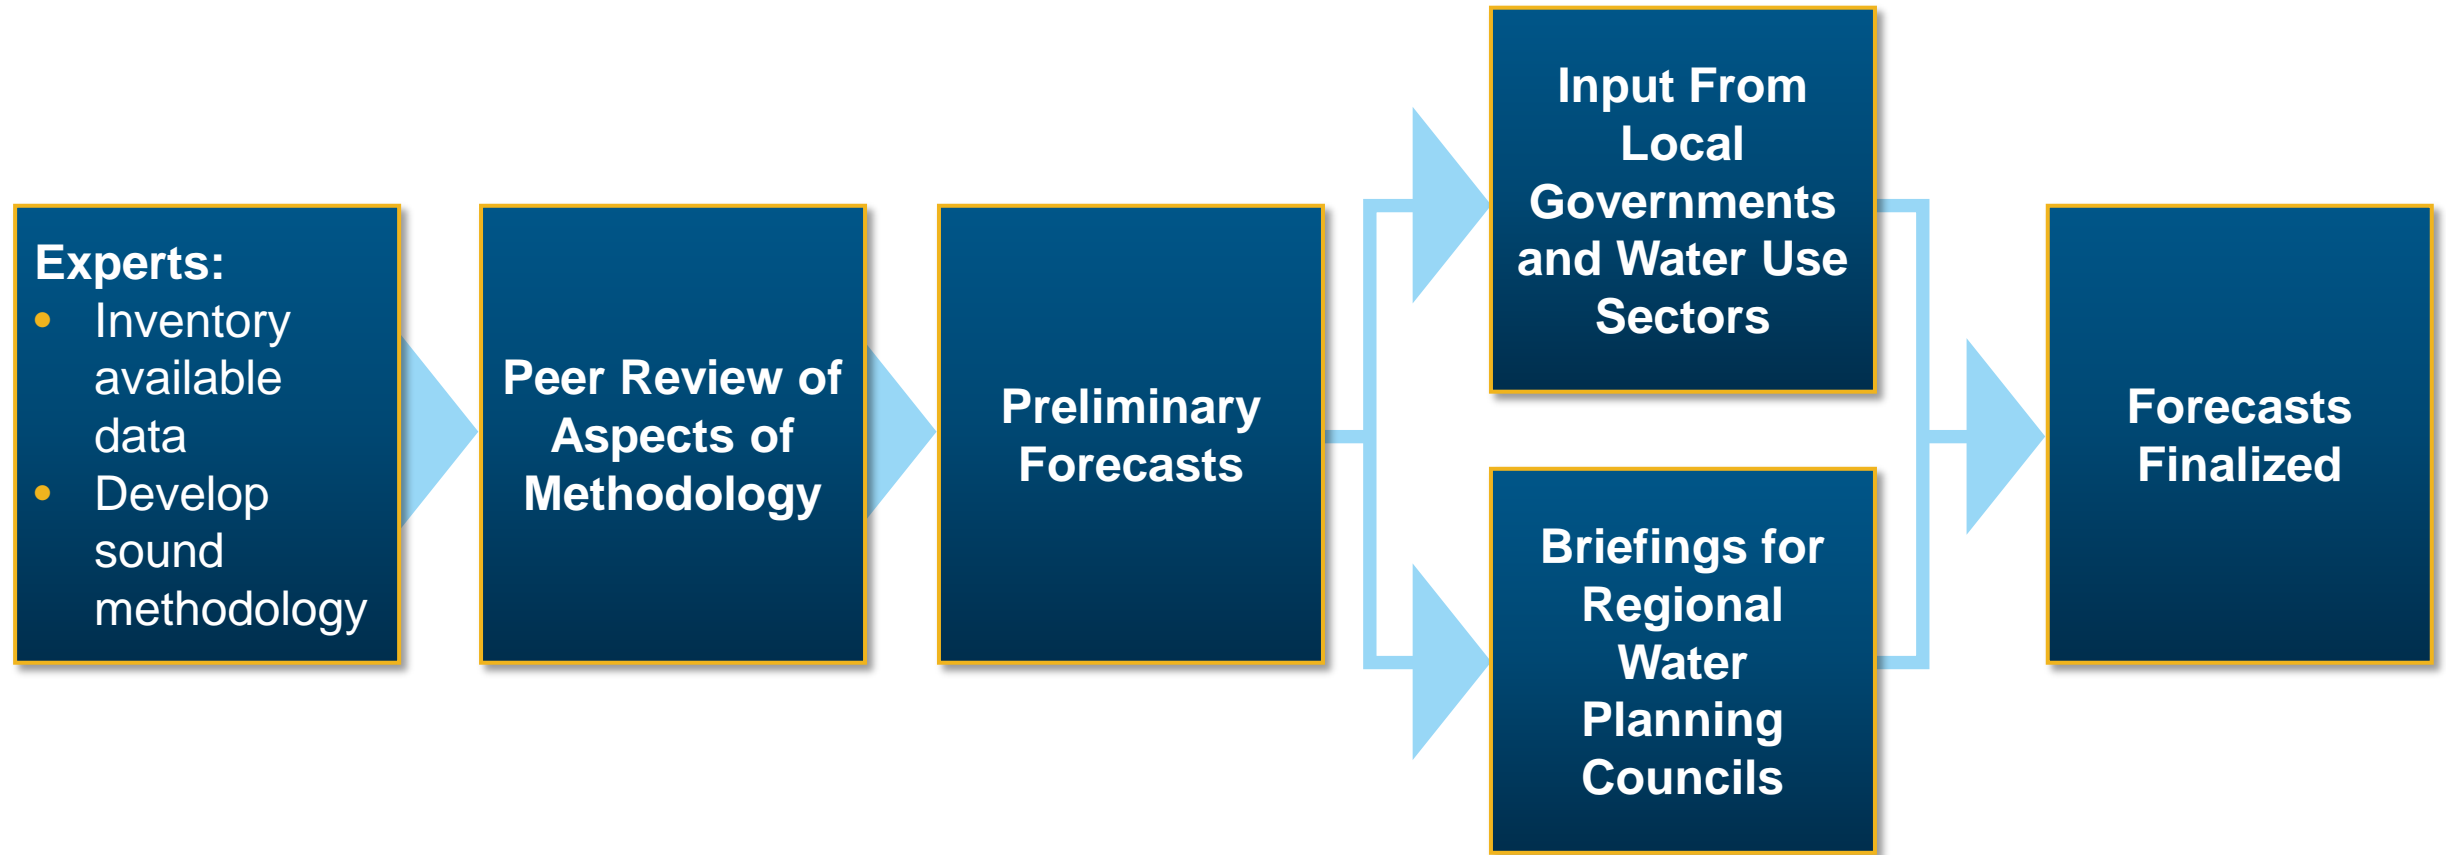

## Forecasts

Forecasts describing water and wastewater needs support evaluation of long-term sustainable water management, when considered in parallel with resource assessments. Five forecasts are provided to the regional water planning councils:

- Population Projections
- Municipal Water & Wastewater Demands
- Industrial Water & Wastewater Demands
- Agricultural Demand
- Energy Demand

# Development of Forecasts

- Population Projections
- Municipal Water & Wastewater Demands
- Industrial Water & Wastewater Demands
- Agricultural Demand
- Energy Demand

# Updated Demand Forecasts

As a reminder, we encourage council members to review the forecasts presented at Council meetings and available on the website.\*

## **New updates have been completed for:**

- **Municipal Water & Wastewater Demands (incorporates population projections)**
- **Industrial Water & Wastewater Demands**
- **Water Use Associated with Energy Demand**

## **Updates are being finalized now for:**

- **Agricultural Demands**

# Planning Information Compilation and Evaluation

## Water Resource Assessments

## Forecasts

## Public Participation

## Water Resource Assessments

Resource assessments along with the forecasts form the scientific basis for the Regional Water Plans. Three resource assessments will be provided to the regional water planning councils:

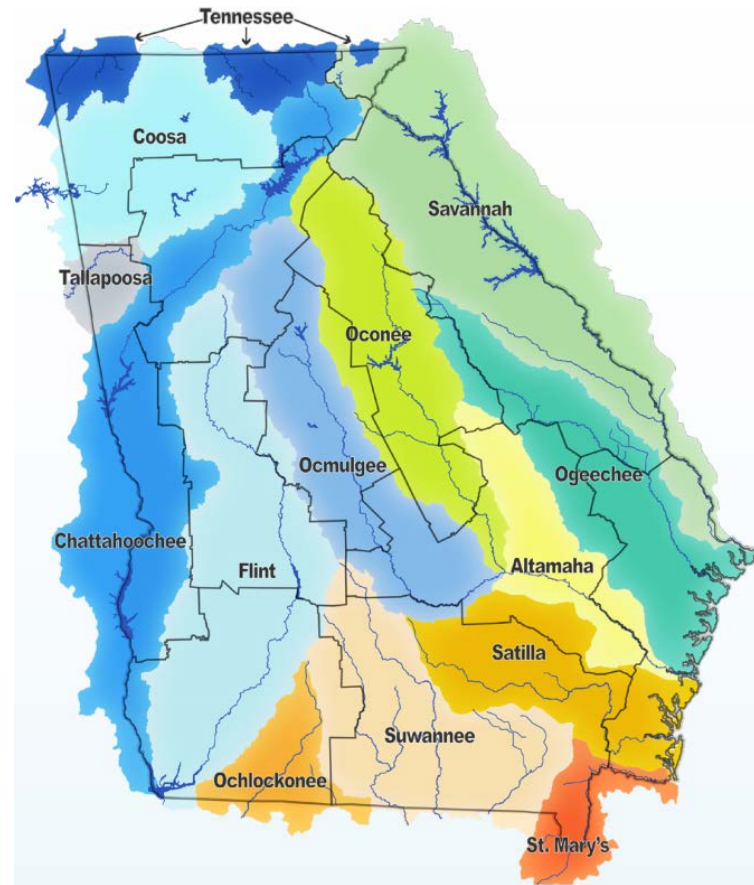

- Groundwater Availability
- Surface Water Availability
- Surface Water Quality

Assessments are completed based on the boundaries of the resource, not the water planning region.

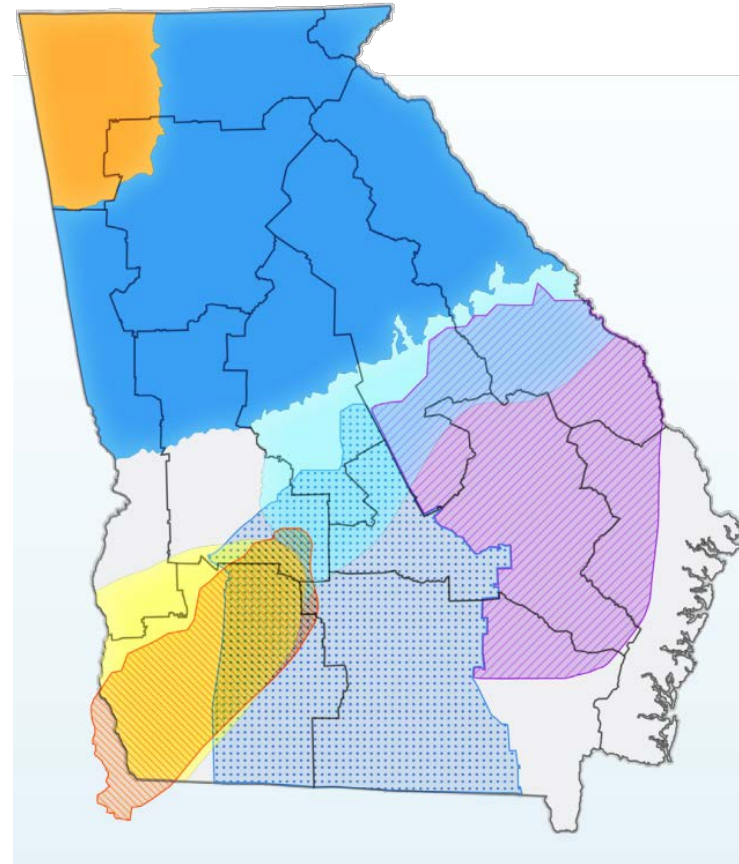

# Water Resources in Georgia

## Surface Water

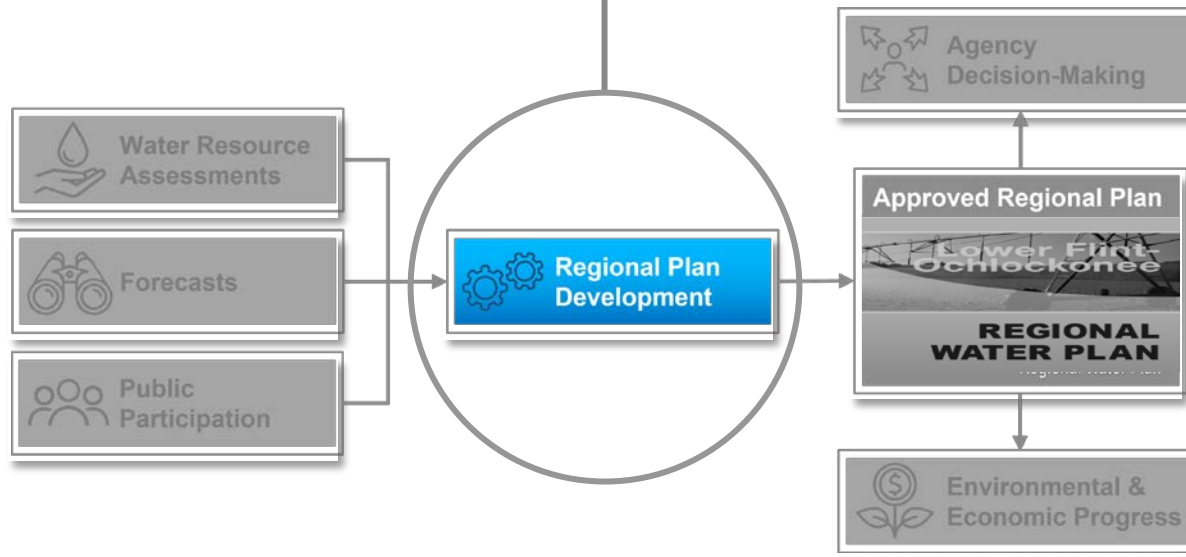

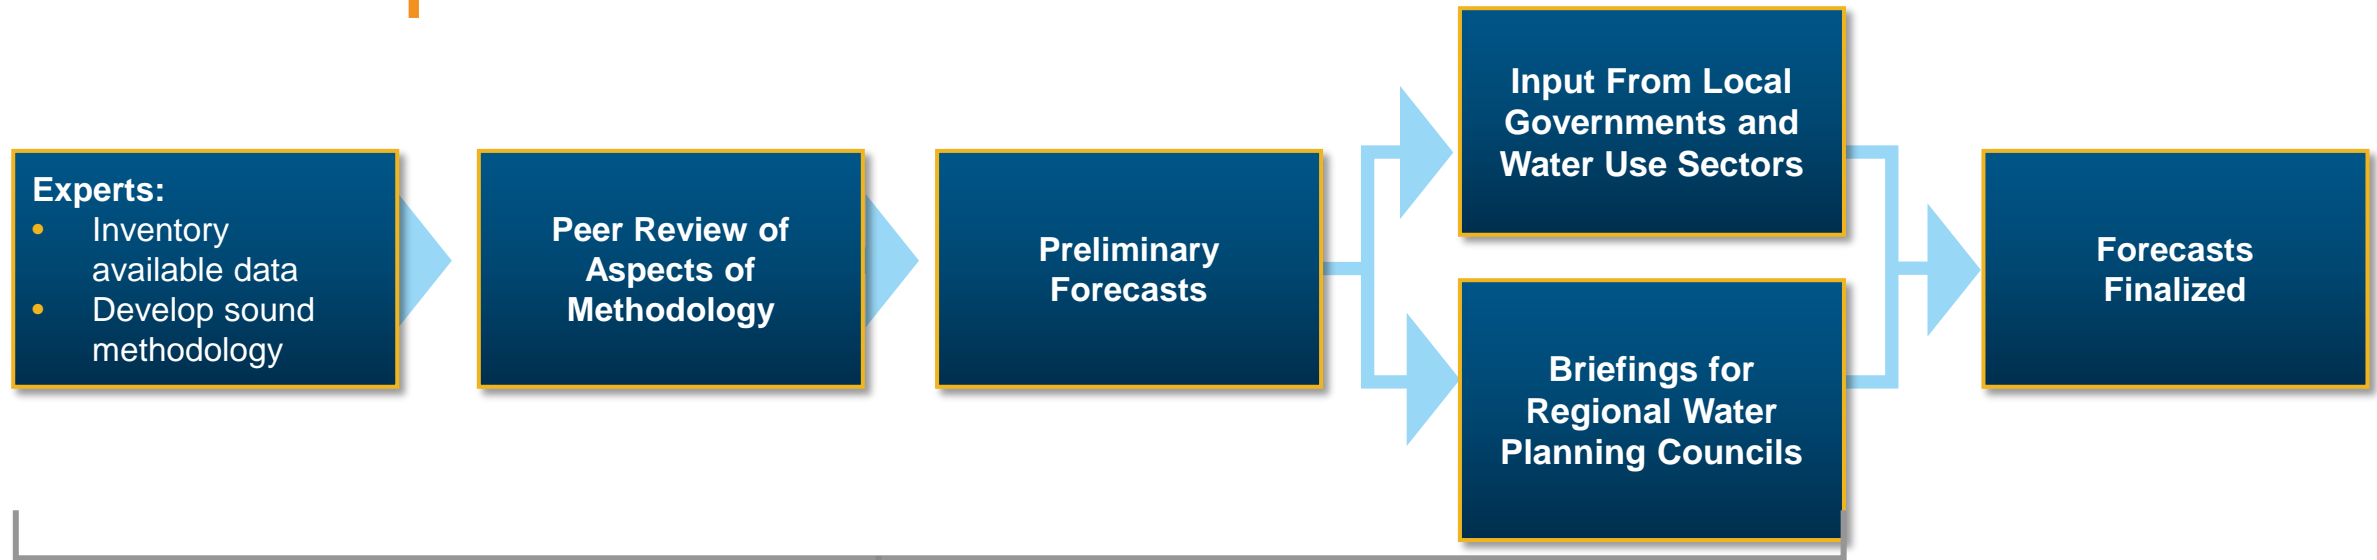

## Groundwater Aquifers

## AQUIFER LEGEND

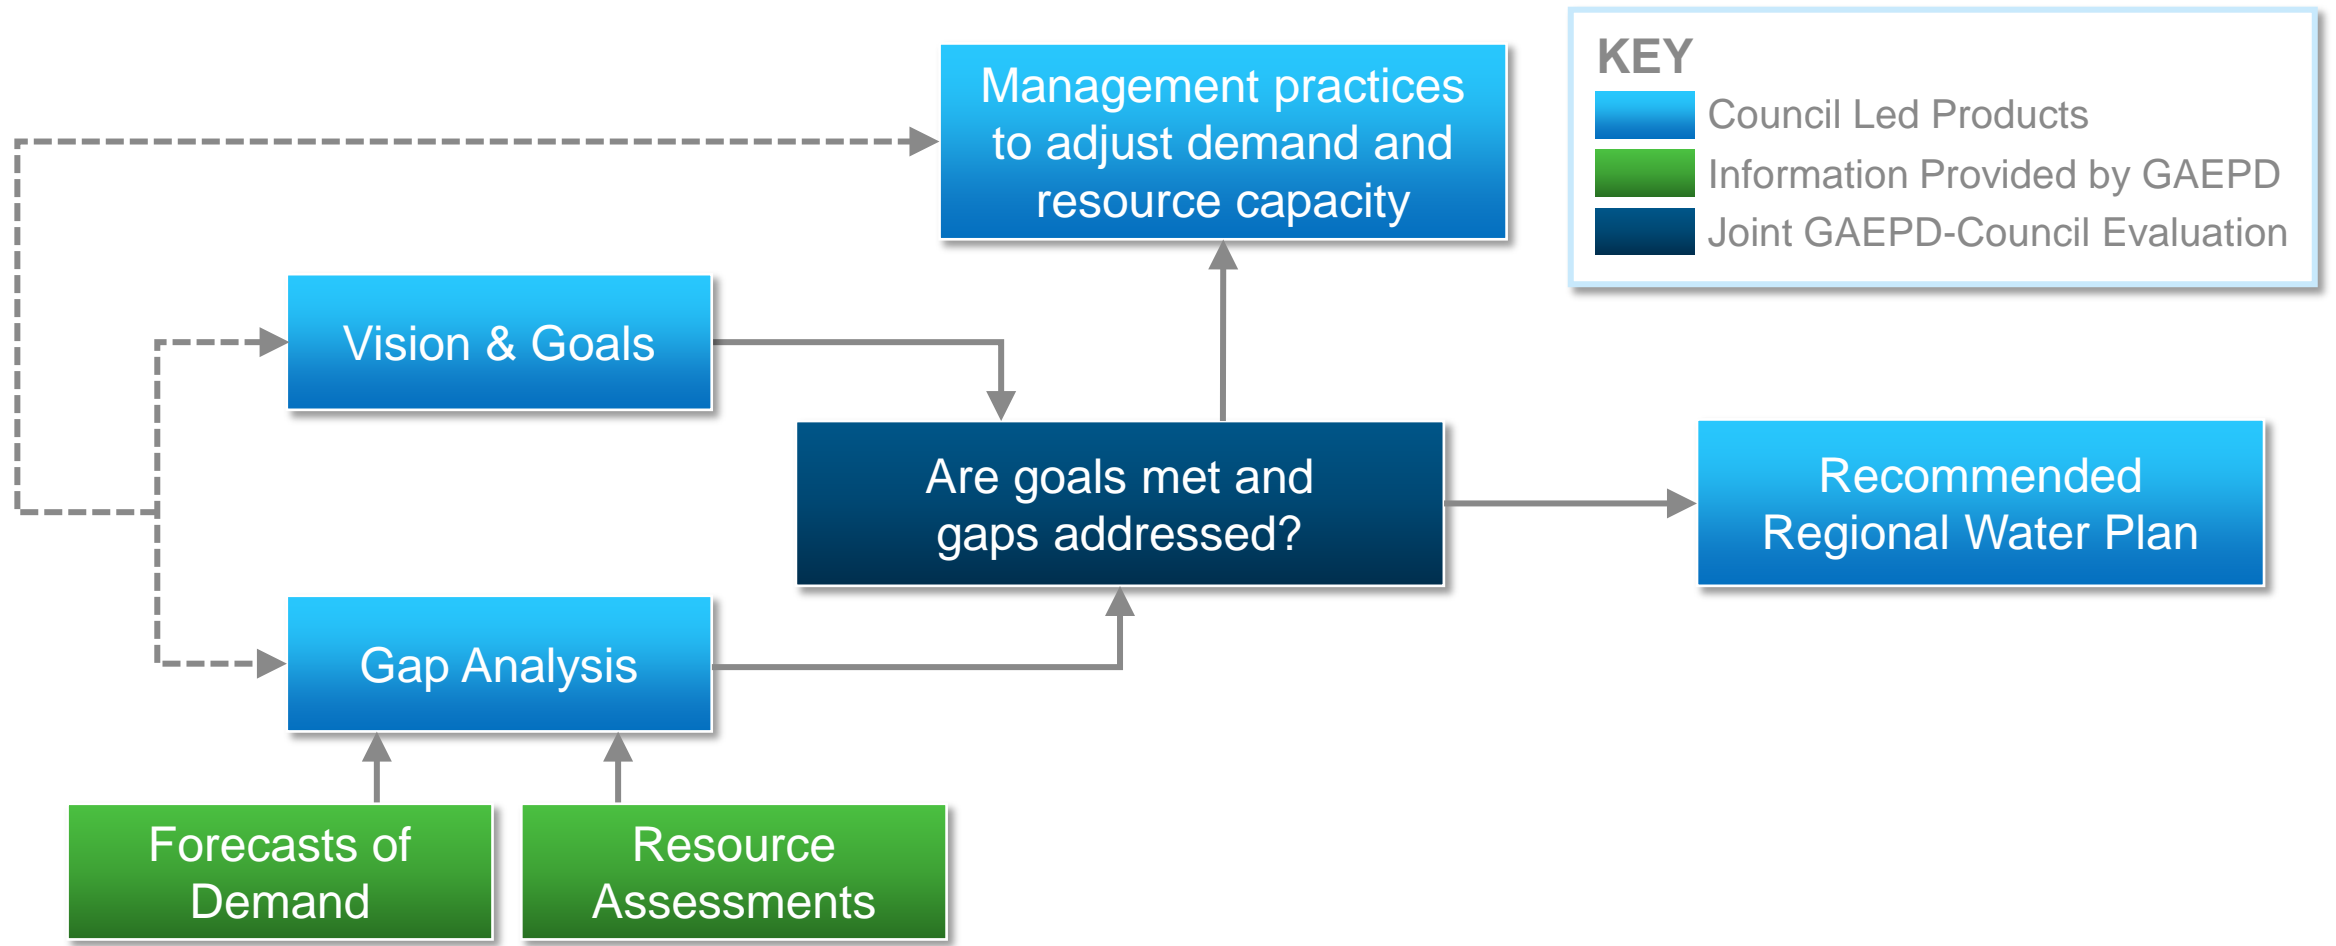

- Paleozoic-rock Aquifer
- Crystalline-rock Aquifer
- Cretaceous Aquifer in Georgia's Coastal Plain
- Claiborne Aquifer in Georgia's Coastal Plain
- South Central Georgia Floridan Aquifer Area
- Dougherty Plain Upper Floridan Aquifer Area
- Eastern Coastal Plain Floridan Aquifer Area

# Development of Resource Assessments

- Groundwater Availability
- Surface Water Availability
- Surface Water Quality

# Path Forward: Information Flow/Products

# Final Product

## Approved Regional Plan

The Director of EPD is charged with the review and approval of recommended Regional Water Plans as outlined in the State Water Plan.

The Director will either:

- Adopt the recommended Regional Water Plan as submitted;
- Advise the regional water planning council of necessary changes to make the plan approvable; or
- Adopt a recommended Regional Water Plan with conditions

# Planning Information Compilation and Evaluation

Water Resource  
Assessments

Forecasts

Public  
Participation

## Public Participation

The Regional Water Plan development process must be open and inclusive, as participation from a diverse audience will result in better implementable decisions and a wide base of support for implementation. The following will be hallmarks of the efficient, effective, transparent regional planning process:

- Open Meetings
- Web-Posted Documents and Reports
- Public Input on the Draft Plan

# Regional Water Plan Update

## Regional Water Plan Review and Revision Schedule

**Meeting One**  
4th Quarter 2021

**Meeting Two**  
Council Meeting  
1st Quarter 2022

**Meeting Three**  
2nd Quarter 2022

**Meeting Four**  
3rd Quarter 2022  
Draft Plan

**Meeting Five (Final)**  
4th Quarter 2022  
Incorporate  
Comments

*EPD targeted date of  
adoption of revised  
Regional Water Plan by  
December 2022*

# Lower Flint-Ochlockonee Region Overview

2021 Council Member Orientation

# Lower Flint-Ochlockonee Memorandum of Agreement

- Original signed June 2009 between LFO Council, GA EPD, GA DCA
- Council reviewed the agreement with the 2017 Review and Revision planning
- Agreement was renewed in 2016
- Agreement includes Operating Procedures and Rules for Meetings

# Lower Flint-Ochlockonee Water Council Operating Procedures and Rules for Meetings

- Council updated the procedures with the 2017 Review and Revision planning
- Key points / updates:
  - Council operates by consensus
  - Fallback on decision-making is simple majority
  - Quorum is defined as 50 percent plus one of the active Council members (inactive members have missed 3 consecutive meetings)
  - Operating Procedures and Rules for Meetings may be amended
  - Chair is authorized to speak for the Council

# Lower Flint-Ochlockonee Region

## Council's Vision:

*The Lower Flint-Ochlockonee Water Planning Council will manage water resources in a sustainable manner to support the region's economy, to protect public health and natural systems, and to enhance the quality of life for the region's citizens.*

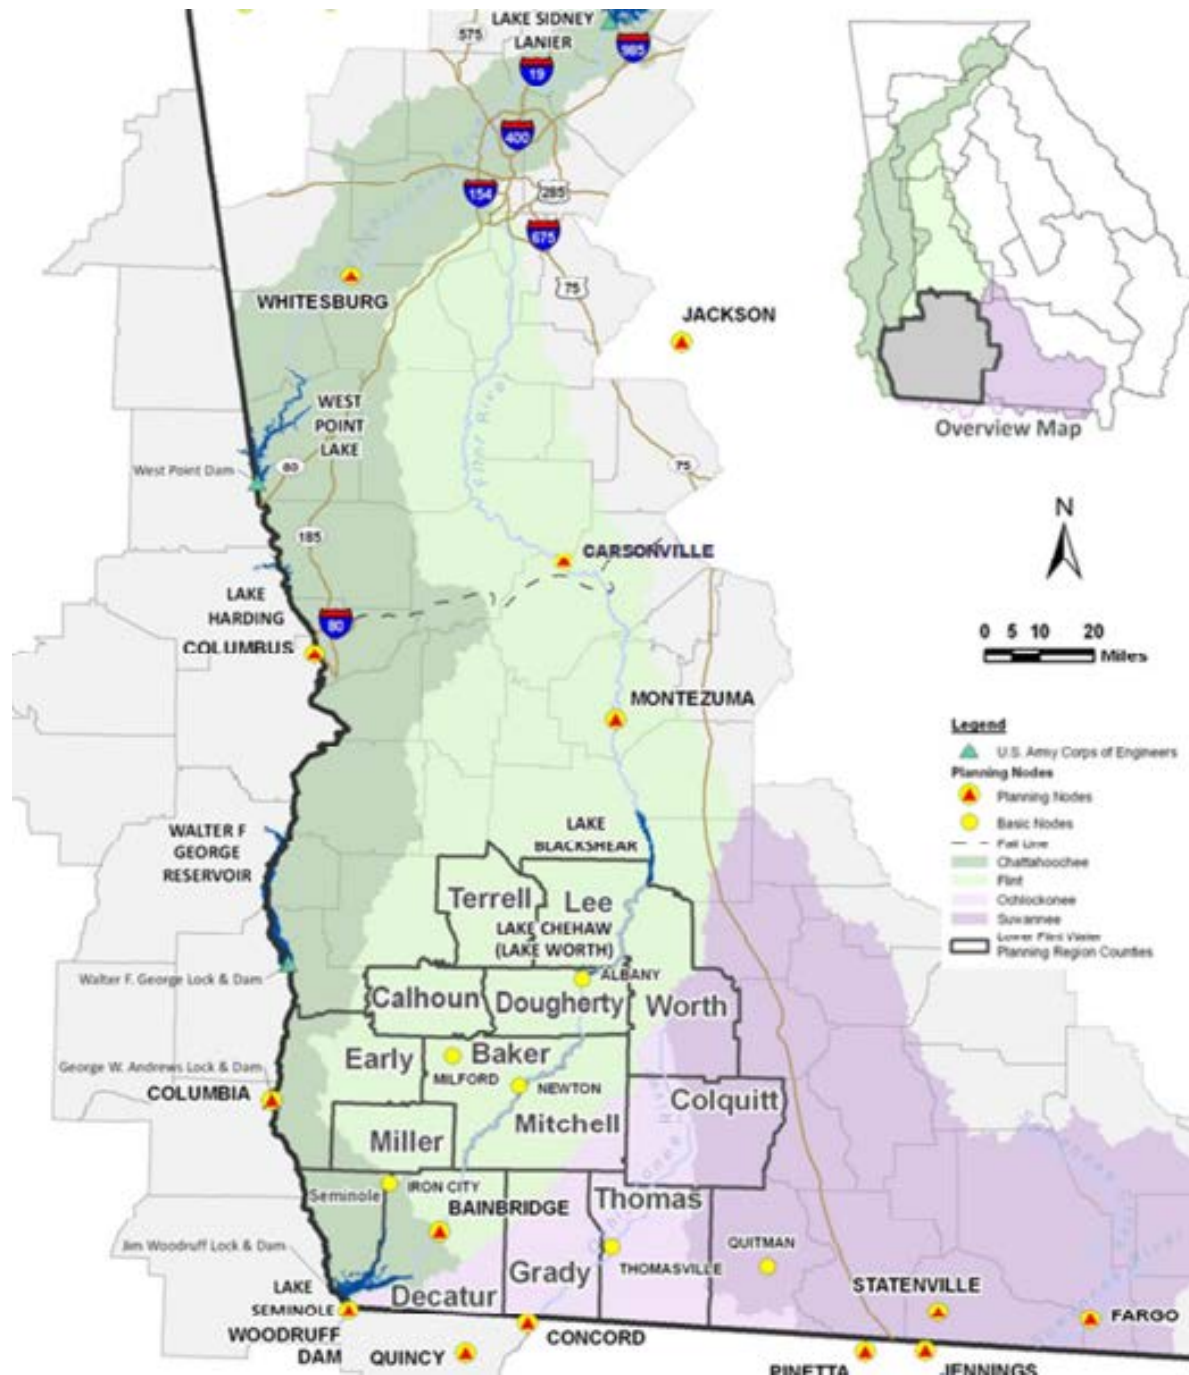

# Lower Flint-Ochlockonee Council Goals

1. **Ensure access to water resources** for existing and future water users in the Lower Flint-Ochlockonee Water Planning Region.
2. **Sustain the region's aquifers**, the Floridan, the Claiborne, the Clayton, and the Cretaceous, in a healthy condition that will continue to support the natural systems and economic activities of the Lower Flint-Ochlockonee Water Planning Region.
3. **Maintain the production-agriculture-based economy** of the Lower Flint-Ochlockonee Water Planning Region.
4. **Support sustainable economic growth** in the Lower Flint-Ochlockonee Water Planning Region.

# Lower Flint-Ochlockonee Region

# Lower Flint-Ochlockonee Regional Water Plan

## What is the Regional Water Plan?

- Water and Wastewater Forecasts & Water Resource Assessments
- Water Management Practices to meet water resource needs through 2050
  - Demand Management (6)
  - Water Supply Management (6)
  - Water Quality (5)
- Recommendations to the State and Joint Recommendations (with neighboring councils)
- Use of plan
  - By GA EPD for permit applications and renewals
  - By GEFA for grant and loan applications

# Lower Flint-Ochlockonee Regional Water Plan

## High Priority Management Practices

### 1. Demand Management

- *Continue to improve agricultural water use efficiency through innovation and technology.*

### 2. Supply Management and Flow Augmentation

- *Evaluate reservoir storage options in the Flint River Basin, including better utilization of existing storage, that can provide for flow augmentation in dry periods.*
- *Replace surface water withdrawals with groundwater withdrawals, where site specific evaluation indicates that this practice is practical and will not harm environmental resources.*

### 3. Water Quality

- *Improve enforcement of existing permits and regulations and implementation of existing plans and practices.*

# Lower Flint-Ochlockonee Region

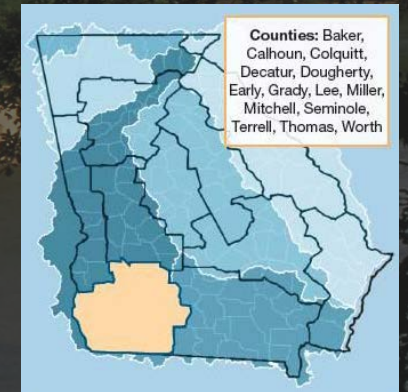

## Key Water Resource Issues Being Addressed by the Council in the 2017 Plan

Resource Assessment	Summary of Model Results	Council Plan to Address Results
<b>Surface Water Availability</b>	The model identified potential gaps in surface water availability in the Flint River Basin at Bainbridge and in the Ochlockonee River Basin at Quincy and Concord under both current and forecast demands. Potential gaps were also identified by the model at Pinetta in the small part of the Suwannee River Basin that is in this water planning region.	Address the potential gaps with conservation and supply augmentation practices as much as possible, while also collecting better information to support more thorough evaluation of resource capacity and the impacts of potential gaps identified by the assessment models on in-stream and downstream uses.
<b>Groundwater Availability</b>	Groundwater use is below the sustainable yield range estimated by the model for the Claiborne Aquifer and the Upper Floridan Aquifer in South-Central Georgia. It is above the sustainable yield range estimated by the model for the Upper Floridan Aquifer in the Dougherty Plain. Aquifer use above the estimated sustainable yield range does not necessarily mean the aquifer is likely to be exhausted by use. Instead, management practices may be needed to meet long-term demands.	Use of the Claiborne Aquifer should be further evaluated to develop appropriate management strategies that address geographic and time-based variations in capacity and demands. In the Upper Floridan Aquifer in the Dougherty Plain, the impact of groundwater withdrawals on surface water flows in the Flint River Basin continues to be a determining factor in guiding the location and amount of groundwater use from this aquifer. Collect better and more geographically specific information on groundwater resource capacity, as needed to evaluate specific uses and management practices.
<b>Surface Water Availability</b>	Water quality model results indicated decreasing availability of assimilative capacity in some areas of the Flint River Basin as discharge flows increase in the future. In other areas, expected improvements in wastewater treatment are projected to improve available assimilative capacity under future conditions.	Implement practices targeted especially toward nonpoint sources of pollutants to improve assimilative capacity and reduce nutrient loading in the region's streams and lakes. It is expected that EPD will adjust point source permit limits over time as needed to address assimilative capacity constraints and nutrient criteria. Collect more complete information to confirm model results and to support the targeting of management practices for water quality in the future.

# Thank You

# Lower Flint – Ochlockonee Council Meeting

November 5, 2021

**GEORGIA  
WATER PLANNING**

[waterplanning.georgia.gov](http://waterplanning.georgia.gov)

# Chair's Report

Presented by Chairman Royal

# Briefing: Water Projects in Region

---

# City of Thomasville Stormwater Data Collection and Assessment FY021 Regional Water Plan Seed Grant Update

## Quarterly Progress Report

- Tasks completed (Previous quarter):
  - Hosted Regional watershed workshop 9/14/21 - Chairman Royal gave brief remarks
- Tasks in process:
  - Procure qualified consultant for stormwater action plan - 90% complete;
  - QA/QC Monitoring Plan (following procurement) - 0% complete;
  - Provide Stormwater Education to 4th and 6th graders - 10% complete

Brings together scientists and stakeholders to:

- develop new knowledge needed to explore tradeoffs and synergies between the regional agricultural economy and environmental quality;
- understand changes needed to achieve agricultural water security and environmental protection; and
- develop tools, incentives and educational programs for improved decision making

# PROJECT ACTIVITIES AND OUTPUTS

## BMP Research

- Water use, quality, yield impacts of alternative irrigation & nutrient practices
- Digital decision toolkit

## Modeling Platform

- Land use/mgmt. impacts on water quantity/quality, crop/forest production and regional economy
- BMP supply and demand curves

## Stakeholder Engagement

- Baseline & future scenarios
- Tradeoffs & synergies
- Social Learning
- Communication tools

## Extension

- On-farm BMP demos
- In-Service Training programs
- Water Schools

collaborative research and Extension

## OBJECTIVES

- Test **innovative approaches** in water management and identify new paths forward to water security for agriculture and natural systems in Southwest Georgia
- Provide **field-tested data** on producer preferences with respect to irrigation suspension via an auction format to inform policy
- Add to the **toolbox** of drought management policies and incentives
- Work **collaboratively** to reflect the needs and interests of stakeholders and make policy and management recommendations together (as appropriate)

# Planning Updates from Georgia EPD

Jennifer Welte, Georgia EPD

# Regional Water Plan Update Process

- Coordinated with the Metro Water District
- Process began in 2020 with Forecasting work
- Target for updated Plans by end of 2022
  - Draft Plans on public notice by Sept. 30, 2022
  - Updated Plans completed by Dec. 2022
- Technical work completed/ongoing that underlies the Regional Water Plans
- Quarterly Council Meetings

# Plan Updates Schedule

## Regional Water Plan Review and Revision Schedule

Council Meeting  
4th Quarter 2021

Council Meeting  
1st Quarter 2022

Council Meeting  
2nd Quarter 2022

Council Meeting  
3rd Quarter 2022  
Draft Plan

Council Meeting  
4th Quarter 2022  
Final Plan

*EPD targeted date of  
adoption of revised  
Regional Water Plans by  
December 2022*

# Regional Water Plan Review and Revision Process

The 5-Year Review Process will focus on:

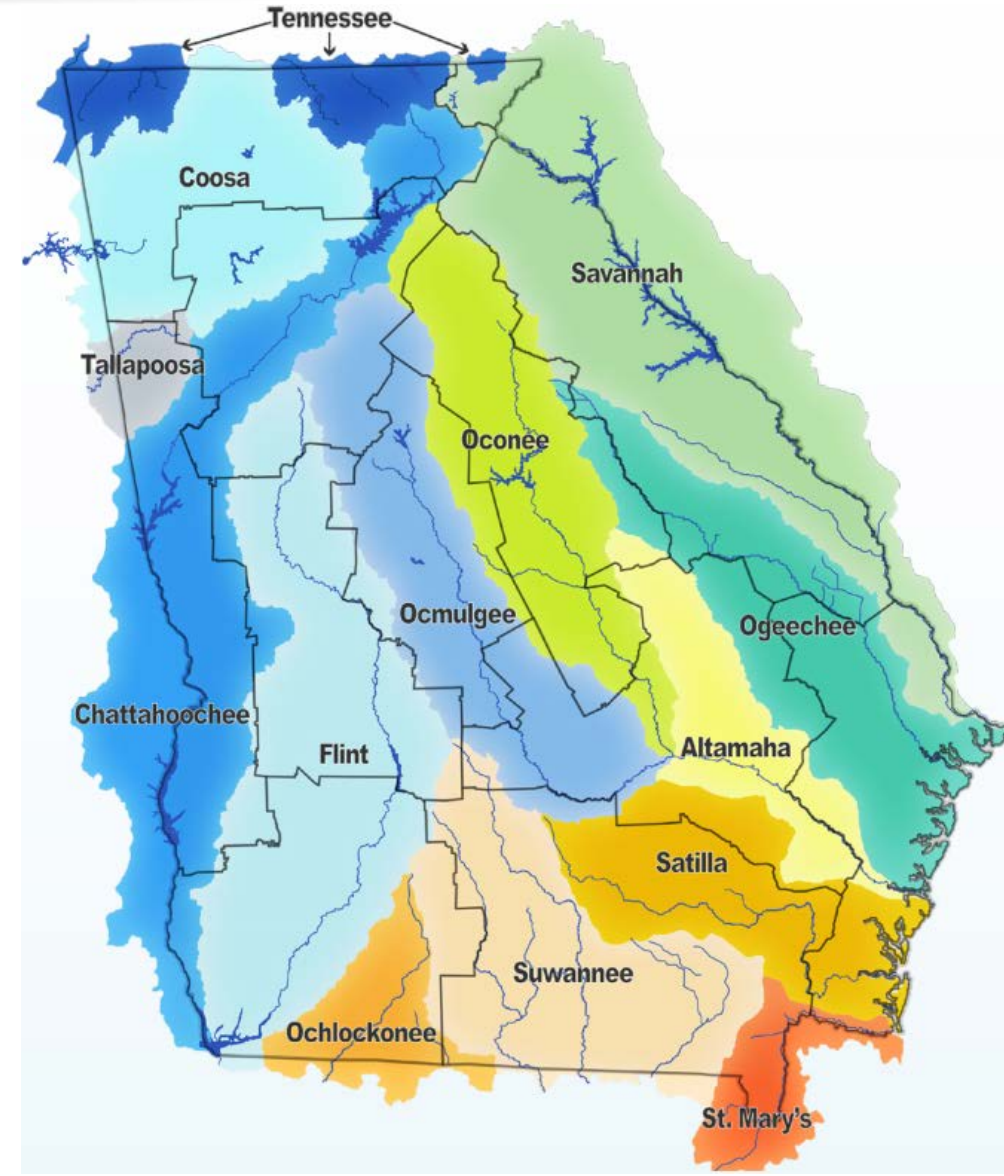

- Updated water demand and wastewater return forecasts
- Updated Surface Water and Ground Water Availability Resource Assessments (Quantity)
- Updated Surface Water Quality (Assimilative Capacity) Resource Assessment
- Refine Management Practices, if needed, to address water resource conditions or Council vision/goals

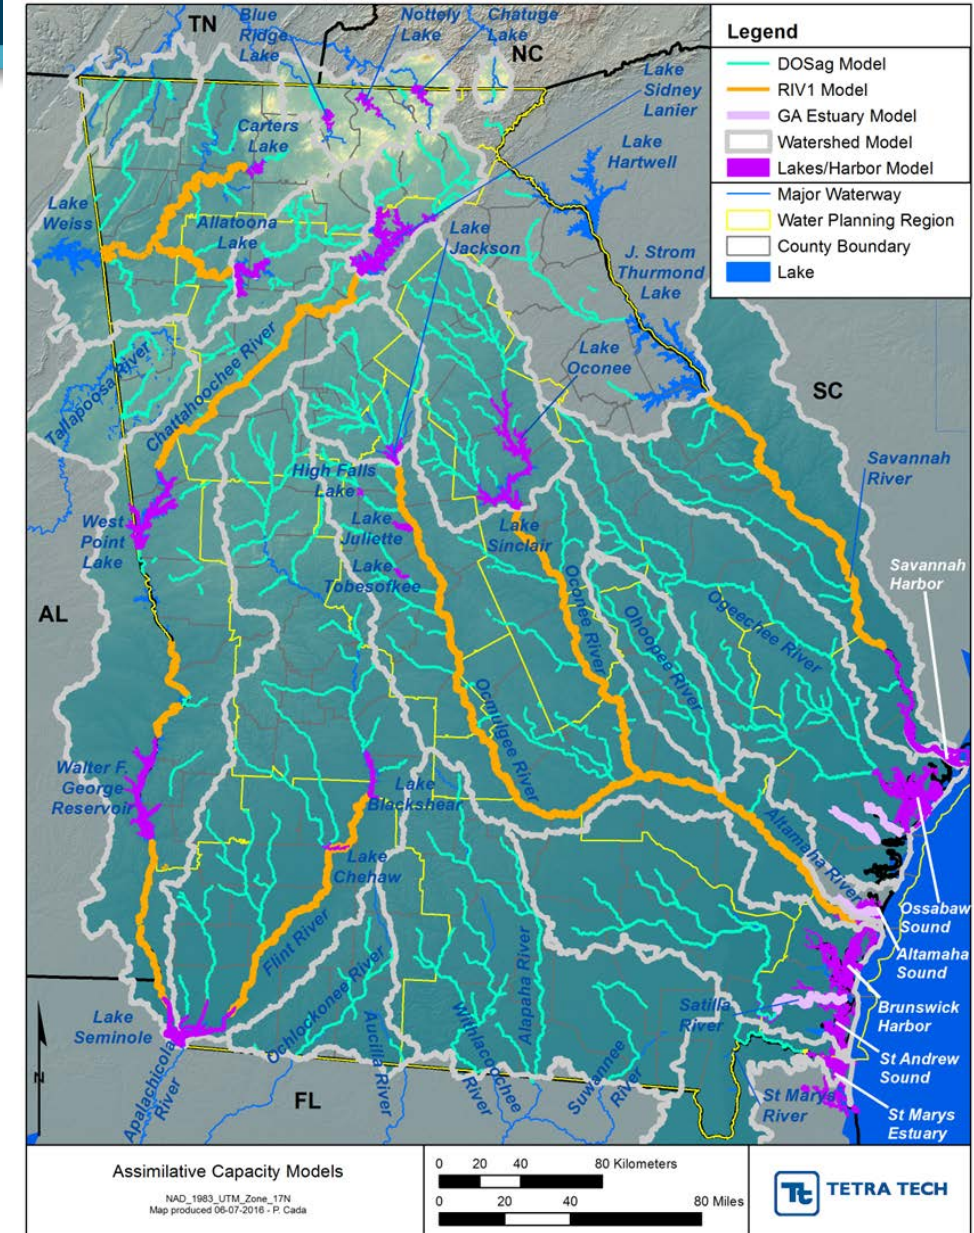

# Surface Water Resources in Georgia

**Water Planning Regions**

# Surface Water Quality Resource Assessment

- Updates to Surface Water Quality (Assimilative Capacity) Resource Assessment
  - Updated information & model recalibration
- Parameters being analyzed include instream dissolved oxygen, nutrients (total N, total P) and chlorophyll *a* response in lakes

# Surface Water Availability Resource Assessment

- Updates to Surface Water Quality (Assimilative Capacity) Resource Assessment
  - Updated information & model recalibration
- Updates to Surface Water Availability Resource Assessment
  - New modeling tool: Basin Environmental Assessment Model ("BEAM")
  - Provides analysis at more nodes

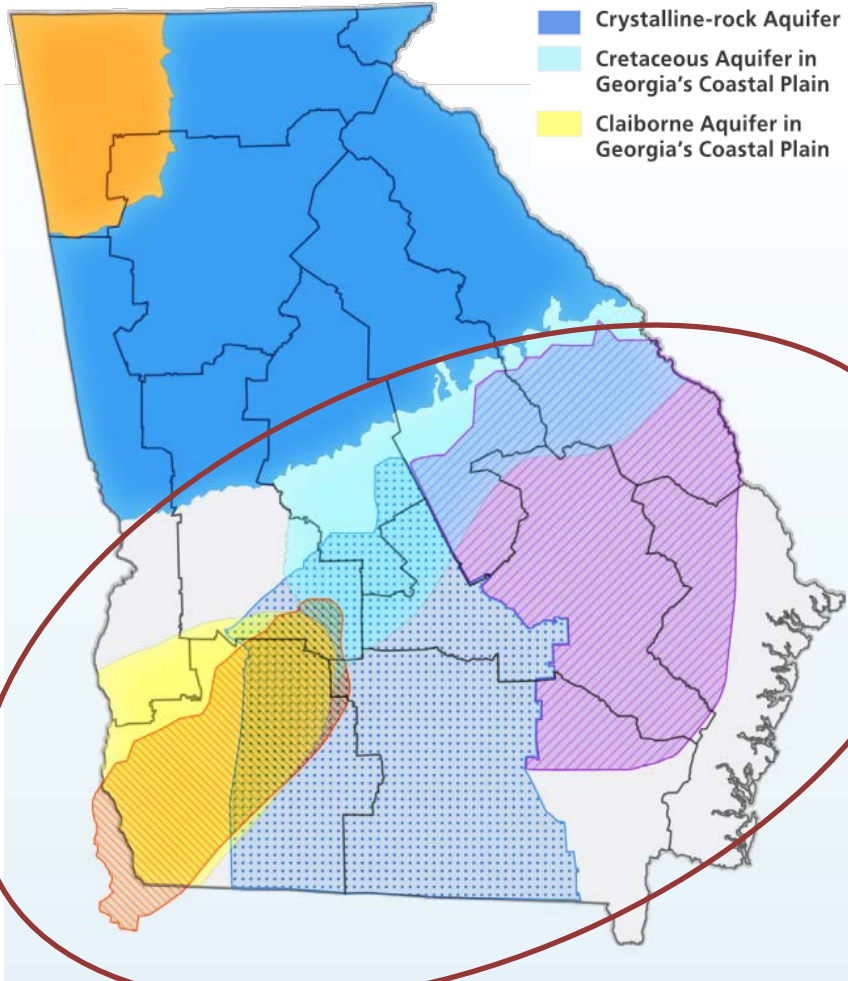

# Groundwater Resources in Georgia

## Groundwater Aquifers

### AQUIFER LEGEND

- |   |   |
|---|---|
|  Paleozoic-rock Aquifer                        |  South Central Georgia Floridan Aquifer Area |
|  Crystalline-rock Aquifer                      |  Dougherty Plain Upper Floridan Aquifer Area |
|  Cretaceous Aquifer in Georgia's Coastal Plain |  Eastern Coastal Plain Floridan Aquifer Area |
|  Claiborne Aquifer in Georgia's Coastal Plain  |   |

Coastal Plain

- Updates to Groundwater Availability Resource Assessment
  - Refined groundwater model with smaller grid spacing and transient pumping in the Coastal Plain (multiple aquifer layers)
  - Will compare updated forecasts to existing sustainable yield estimates in northern Georgia

Jennifer Welte  
Georgia Environmental Protection Division

# Water and Wastewater Forecasts Overview

# Statewide Water Demand Forecast Comparison

	2020 Water Demand Forecast		2025 Water Demand Forecast	
Sector	Forecast Made in 2015	Forecast Made in 2021	Forecast Made in 2015	Forecast Made in 2021
Agriculture	1424.11	1584.3	1617.39	1845.35
Energy (Withdrawals)	727.64	383.11	935.69	360.44
Industrial	721.25	465.14	846.42	470.29
Municipal	715.35	694.49	825.49	744.20
<b>Total Water Demand (MGD)</b>	<b>3588.35</b>	<b>3127.04</b>	<b>4224.99</b>	<b>3420.28</b>

Statewide 2015 Water Demand Forecast for 2050

Statewide 2021 Water Demand Forecast for 2050

Note: Values shown do not include MNGWPD municipal demand

# Statewide Water Demand Forecast Comparison

### Key Takeaway

- 2021 Statewide Agricultural Water Demand Forecast increases in comparison to 2015 Forecast

# Statewide Water Demand Forecast Comparison

## Energy

### Key Takeaway

- 2021 Statewide Energy Demand Forecast (withdrawals) decreases in comparison to 2015 Forecast

# Statewide Water Demand Forecast Comparison

## Key Takeaway

- 2021 Statewide Industrial Water Demand Forecast utilizes stakeholder input to develop forecast

# Statewide Water Demand Forecast Comparison

## Key Takeaway

- Municipal Water Demand Forecasts reflect lower totals for the 10 regional water planning councils

Note: Values do not include MNGWPD

# Lower Flint-Ochlockonee 2050 Water Demand Forecast Comparison

## 2050 Forecast Region Comparison to the State

2050 Water Demand Forecast Comparison to Previous		
Sector	Forecast Made in 2015	Forecast Made in 2021
Agriculture	676.42	754.64
Energy	6.08	0.17
Industrial	133.12	118.16
Municipal	47.99	40.52
Total Water Demand (MGD)	863.60	913.49

# Baseline Crop Mix by RWPC

## Lower Flint-Ochlockonee RWPC

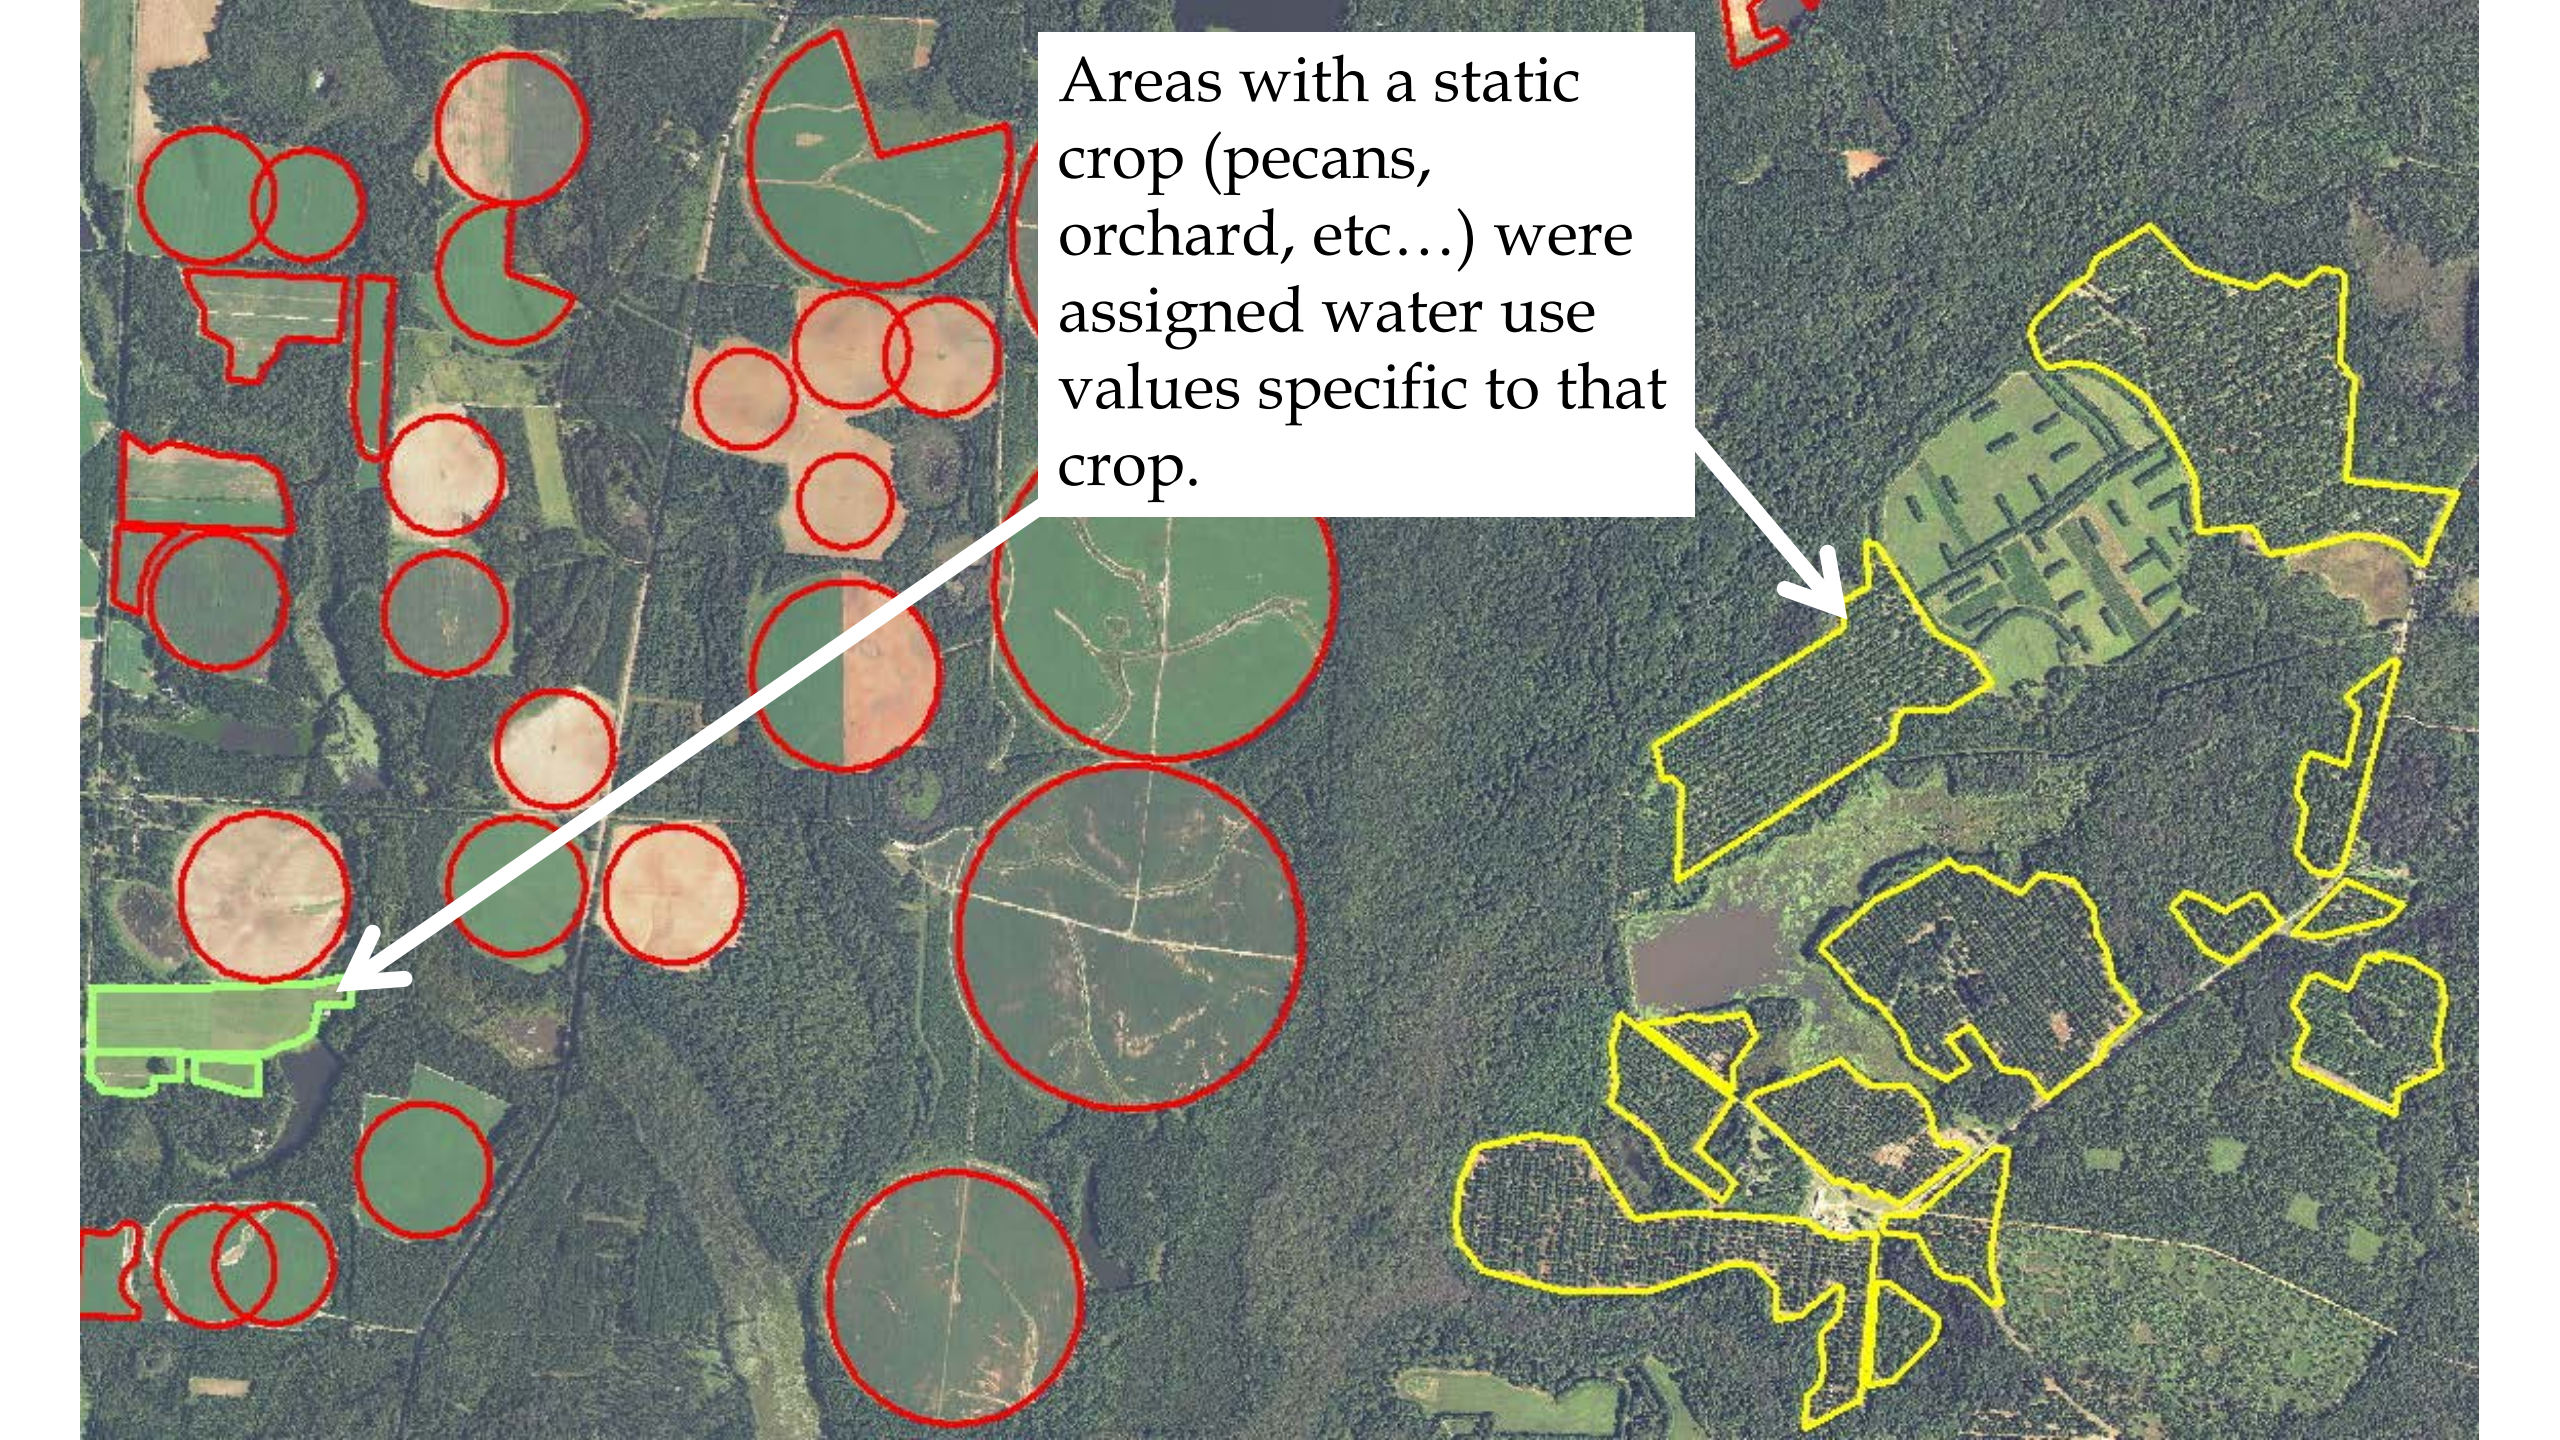

An aerial photograph of a rural landscape with various agricultural fields. Numerous fields are outlined with red circles or polygons of varying sizes. Some of these red-outlined fields are filled with a semi-transparent green color, while others are filled with a semi-transparent tan color. In the lower right portion of the image, there is a cluster of fields outlined with yellow polygons. A white arrow points from a text box to one of the green-filled fields. The text box contains a paragraph explaining the use values assigned to the rotation areas based on crop mix percentages in the county.

Rotation areas  
assigned use values  
based on the crop mix  
percentage in the  
county. (e.g. the use  
on this pivot is x%  
corn, y% peanut, z%  
cotton, etc...).

An aerial photograph of a rural landscape. The left side of the image shows a patchwork of fields, many of which are outlined with red circles or polygons. Some of these fields are filled with a light brown color, while others are green. A white arrow points from the text box to one of these red-outlined fields. The right side of the image shows a large, irregularly shaped area outlined in yellow, which appears to be a forest or a large field. Another white arrow points from the text box to this yellow-outlined area. A text box is located in the upper center of the image, containing the following text:

Areas with a static  
crop (pecans,  
orchard, etc...) were  
assigned water use  
values specific to that  
crop.
